

What Houseplant is That? Classroom Presentation

Task: Prepare a two minute presentation on any houseplant of your choice. Your presentation should include common and scientific names, how to maintain the plant, special features and adaptations, country of origin (native habitat) and reasons why you selected this specific plant. You have the option of actually bringing in a small sample of the plant or sharing with me a photo through Google slides. All photos need to be shared/emailed prior to the presentation.

The only material you may refer to are index cards which will be collected at the end of the presentation. Powerpoint presentations are discouraged.

Length: 2 minutes

Due Date: _____
