

Will that Plant Regrow?

Plant Regrowth Experiment

In pairs, select two of the plants listed below and complete the following:

- i. Research how to regrow the plants.
- ii. Set-up your experiment using the materials provided & record the start date.
- iii. Place your plants in the greenhouse in the area specified.
- iv. Create a data table for your observations.
- v. Monitor your plant over the next six weeks and document any changes.

1. Carrot tops

2. Pineapple top

3. Lettuce base (preferably romaine lettuce)
